### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas E. Anderson on March 15, 2005.

The application has been amended as follows:

#### In the Claims:

2. (currently amended) The method of claim 1, wherein the step of ~~calculating~~ determining the overall drop probability further comprises calculating an overall drop probability that will drive the actual queue size to the target queue size.

3. (currently amended) The method of claim 2, wherein the step of ~~calculating~~ determining the overall drop probability comprises decreasing the overall drop probability if the actual queue size is smaller than the target queue size and increasing the overall drop probability if the actual queue size is greater than the target queue size.

11. (currently amended) The system of claim 10, wherein the overall drop probability calculation ~~tools~~ means comprise means for calculating all overall drop probability that will drive the actual queue size to the target queue size.

12. (currently amended) The system of claim 11, wherein the overall drop probability calculation ~~tools~~ means comprise means for decreasing the overall drop probability if the actual queue size is smaller than the target queue size and increasing the overall drop probability if the actual queue size is greater than the target queue size.

**In the Specification:**

Replace the paragraph on page 1, lines 4-6 with the following:

This patent application is a Continuation-In-Part application of U.S. Patent Application No. 09/455,445, filed on December 6, 1999, which is hereby incorporated by reference herein in its entirety.

***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance: the prior art of record, including Lin et al. (US 6,463,068) which classifies packets for drop probability, fails to anticipate or make obvious the feature of determining an overall packet drop probability based on the queue size and target queue size, and calculating a target class drop probability based on the overall packet drop probability and the weighting factor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Marcelo whose telephone number is 571-272-3125. The examiner can normally be reached on Mon-Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou can be reached on 571-272-3088. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
